

Tuning the Morphology and Composition of Metal Based Nanostructures for Enhancing the Catalytic and Sensing Performance

A Thesis

Submitted by

Mohit Chawla

(Roll No: D12053)

for the award of the degree of

Doctor of Philosophy

School of Basic Sciences

Indian Institute of Technology Mandi

Mandi, Himachal Pradesh-175005

April 2018

*With the blessings of
Almighty God*

Affectionately

Dedicated

To

My loving family

Declaration by the Research Scholar

This is to certify that the thesis entitled “**Tuning the Morphology and Composition of Metal Based Nanostructures for Enhancing the Catalytic and Sensing Performance**”, submitted by me to the Indian Institute of Technology Mandi for the award of the degree of Doctor of Philosophy is a bonafide record of research work carried out by me under the supervision of Dr. Prem Felix Siril. The contents of this thesis, in full or in parts, have not been submitted to any other Institute or University for the award of any degree or diploma.

In keeping with the general practice of reporting scientific observation, due acknowledgements have been made wherever the work described is based on the findings of other investigators.

Acknowledgements

While pursuing my PhD degree, many seen and unseen hands pushed me forward, encouraged me during ups and downs and provided continuous support of their experience and knowledge throughout this journey. I shall remain grateful to all of them. I enjoyed this learning journey as a researcher.

First and foremost, I would like to express my deep gratitude and profound indebtedness to my PhD advisor Dr. Prem Felix Siril for his dexterous guidance, invaluable suggestions and perceptive enthusiasm which enabled me to accomplish the task of undertaking the present study. He sets an example of a world-class researcher for his passion on research. His wide knowledge and logical way of thinking has been a great asset for me. I could not have imagined having a better mentor for my doctoral study.

I also want to express my everlasting gratitude to the Doctoral committee members, Dr. S. Ghosh, Dr. V. Krishnan, Dr. C.K. Nandi and Dr. R. Vaish who continually conveyed a spirit of adventure in regard to research. I am grateful to well-known Professors for reviewing the manuscripts and thesis in spite of their busy schedule.

I express my sincere thanks to The Director, IIT Mandi for his support and encouragements. The research facilities at Advanced Materials Research Center (AMRC), IIT Mandi is also gratefully acknowledged hereby. I am also grateful to DST and ICMR for the financial support during the tenure.

I would take this opportunity to thank our collaborators Dr. Jaspreet Kaur Randhawa (IIT Mandi), Dr. Chayan Kanti Nandi (IIT Mandi), Prof. Gurdip Singh (DDU Gorakhpur), Dr. Reena Dubey (DDU Gorakhpur) and Dr. Supriya Singh (DDU Gorakhpur) for lending their continuous support and expertise.

I am also very much thankful to my research group members for their invaluable support and help during my research work. I would like to thank all my friends for their continuous support and encouragement. I would be failing in my duties if I do not thank my brotherly friends Navneet Singh and Sunil Kumar. You provided eternal optimism and encouragement in me. I also express my gratitude towards AMRC staff for their assistance in lab.

A special thanks for my eternal mentor Swami Dayanand Ji Maharaj, for his countless blessings, encouragement and support. This work would not have been possible without his companionship.

At last but not the least, I express my gratitude towards my loving wife Neha for her patience, inspiration, motivation and co-operation. I express profound sense of reverence to my parents for their untiring support and co-operation. I can never forget endless tolerance and constant encouragement from all my family members during the tough and happy moments of the journey.

Above all, all the praise is due to the Almighty God, the ultimate source of knowledge, a part of which He reveals to man and peace be upon all his Messengers throughout the world for success and guidance of mankind. I express my gratitude and indebtedness to the Almighty for countless blessings.

Table of Contents

Acknowledgements.....	i
Abbreviations.....	xi
List of figures.....	xv
List of tables.....	xxvii
Abstract.....	xxix

Chapter 1 Introduction nanomaterials: Synthesis and applications in catalysis and sensing

1.1 Nanomaterials: An Overview.....	1
1.2 Advances in Nanomaterials.....	2
1.3 Classification of Nanomaterials.....	3
1.3.1 Gleiter's classification of nanostructured materials.....	3
1.3.2 Classification of nanomaterials based on dimensionality.....	4
1.4 Synthesis of nanomaterials.....	5
1.4.1 Role of soft templates in the synthesis of nanomaterials.....	6
1.4.1.1 Surfactants and their self-assembly.....	7
1.4.1.2 Lyotropic liquid crystals (LLCs) or mesophases.....	8
1.4.1.3 Swollen liquid crystals (SLCs)	9
1.4.1.3.1 Stability of SLCs.....	10
1.4.1.3.2 Characterization of SLCs.....	12
1.4.1.3.3 Applications of SLCs as soft templates in the synthesis of nanomaterials.....	14
1.4.1.3.3.1 Noble metal nanostructures.....	15
1.4.1.3.3.2 Bimetallic nanostructures.....	19
1.4.1.3.3.3 Polymer nanostructures.....	20

1.4.2	Synthesis of nanomaterials using polyols.....	21
1.4.2.1	Polyols: An overview.....	21
1.4.2.2	Advances in polyol synthesis.....	21
1.4.2.3	Applications of polyols in the synthesis of nanomaterials.....	22
1.4.2.3.1	Noble Metal Nanoparticles.....	23
1.4.2.3.2	Less-noble Metal Nanoparticles.....	24
1.4.2.3.3	Metal Oxide Nanoparticles.....	26
1.4.2.3.4	Layered Hydroxides (LHS)	28
1.4.2.4	Synthesis mechanisms of nanomaterials using polyols.....	29
1.5	Catalytic applications of nanomaterials.....	31
1.5.1	Catalytic conversion of 4-nitrophenol (4-NP) to 4-aminophenol (4-AP).....	40
1.5.1.1	Kinetic Evaluation of 4-NP Reduction.....	42
1.5.1.2	4-NP Reduction Mechanism.....	44
1.5.2	Catalysts for enhancing the burning rate of composite solid propellants (CSPs).....	46
1.5.2.1	Thermal decomposition of ammonium perchlorate (AP)	47
1.5.2.2	The mechanism of high-temperature (>350 °C) thermal decomposition of AP.....	49
1.5.2.3	The effect of additives on thermal decomposition of AP.....	50
1.6	Sensing applications of nanomaterials.....	52
1.6.1	Surface Enhanced Raman Spectroscopy (SERS) based sensing.....	52
1.6.1.1	SERS Mechanism.....	53
1.6.2	Electrochemical non-enzymatic glucose sensing.....	54
1.6.2.1	Glucose mutarotation.....	57
1.6.2.2	Direct electro-oxidation mechanism on non-enzymatic electrodes....	58

1.7 Aims and Objectives of the thesis.....	61
References.....	61

Chapter 2 High catalytic activities of palladium nanowires synthesized using liquid crystal templating approach

Abstract.....	89
2.1. Introduction.....	90
2.2. Experimental.....	92
2.2.1 Materials.....	92
2.2.2 Preparation of mesophases.....	92
2.2.3 Preparation of Pd nanostructures.....	93
2.2.4 Characterization techniques.....	93
2.2.5 Catalytic reduction of 4-nitrophenol (4-NP)	93
2.3 Results and Discussion.....	94
2.3.1 Characterization of SLCs.....	94
2.3.2 Characterization of Pd nanostructures	96
2.3.3 Catalytic Reduction of 4-NP.....	100
2.4 Conclusions.....	109
References.....	109

Chapter 3 Exceptional catalytic activities and sensing performance of palladium decorated anisotropic gold nanoparticles

Abstract.....	117
3.1. Introduction.....	118
3.2. Experimental.....	121
3.2.1. Materials.....	121

3.2.2 Preparation of mesophases.....	121
3.2.2.1 Preparation of Au and Pd mesophases.....	121
3.2.2.2 Preparation of bimetallic Au-Pd mesophases.....	122
3.2.3 Synthesis of Au, Pd and Au-Pd nanostructures.....	122
3.2.4 Characterization techniques.....	122
3.2.5 Catalytic reduction of 4-nitrophenol (4-NP)	123
3.2.6 SERS enhancement and detection of MB.....	123
3.3 Results and Discussion.....	124
3.3.1 Characterization of SLCs.....	124
3.3.2 Characterization of Au, Pd and bimetallic Au-Pd nanostructures.....	126
3.3.3 Catalytic Reduction of 4-NP.....	133
3.3.4 SERS studies.....	141
3.4 Conclusions.....	146
References.....	147

Chapter 4 Calcination temperature as a probe to tune the non-enzymatic glucose sensing activity of Cu-Ni bimetallic nanocomposites

Abstract.....	161
4.1 Introduction.....	162
4.2 Experimental.....	164
4.2.1 Materials.....	164
4.2.2 Synthesis of nanocomposites.....	164
4.2.3 Characterization of nanocomposites.....	165
4.2.4 Preparation of Nafion/catalyst electrode and electrochemical measurement...	165
4.3 Results and discussion.....	166
4.3.1 Characterization of synthesized nanostructures.....	166

4.3.2 Cyclic voltammetry studies	170
4.3.3 Amperometric detection of glucose.....	171
4.3.4 Characterization of calcined samples.....	173
4.3.5 Cyclic voltammetry studies of the calcined nanostructures.....	178
4.3.6 Amperometric detection of glucose using the calcined nanostructures as sensors.....	181
4.3.7 Differential pulse voltammetry (DPV) studies.....	183
4.3.8 Selectivity of the sensor.....	184
4.3.9 Sensor performance in human blood and serum samples.....	185
4.4. Conclusions.....	186
References.....	187

Chapter 5 Effect of composition on the non-enzymatic glucose sensing activity of Cu-Ag bimetallic nanocomposites

Abstract.....	195
5.1 Introduction.....	196
5.2 Experimental section.....	198
5.2.1. Materials.....	198
5.2.2 Synthesis of nanocomposites.....	198
5.2.3 Characterizations of nanocomposites.....	198
5.2.4 Preparation of nafion/catalyst electrode and electrochemical measurements...199	
5.3 Results and Discussion.....	200
5.3.1 Characterization of synthesized nanostructures	200
5.3.2 Cyclic Voltammetry Studies.....	205
5.3.3 Hydrodynamic Voltammetry Studies.....	208
5.3.4 Amperometric detection of glucose.....	209

5.3.5 Differential Pulse Voltammetry (DPV) Studies.....	210
5.3.6 Selectivity, stability and reproducibility of the sensor.....	211
5.3.7 Sensor performance in human blood and serum samples.....	213
5.3.8 Characterization and sensing activity of calcined sample.....	214
5.4 Conclusions.....	220
References.....	221

Chapter 6 Controlling the morphology of layered double hydroxides of Mn and Co and their exceptional catalytic activity

Abstract.....	229
6.1. Introduction.....	230
6.2 Experimental.....	232
6.2.1 Materials.....	232
6.2.2 Synthesis of the LDHs.....	232
6.2.3 Characterizations of the LDHs.....	232
6.2.4. Preparation of CSPs and burning rate measurements.....	233
6.2.5 Thermal analysis of AP and CSPs in the absence and presence of LDHs.....	234
6.2.6 Ignition delay (Di) measurements.....	234
6.3 Results and discussion.....	235
6.3.1 Characterization of synthesized nanostructures	235
6.3.2 Catalytic activity.....	244
6.4 Conclusions.....	257
References.....	258

Chapter 7 Conclusions and future perspectives

7.1 Conclusions.....	265
----------------------	-----

7.2 Future perspectives.....267

Addendum

Response to reviewer’s comments-I.....269

Response to reviewer’s comments-II.....273
