June, 2016

Dedicated to

My Loving Parents

&

Younger Sister and Brother

Acknowledgements

Through this short acknowledgement, I wish to warmly thank to all people who have contributed to the successful completion of this work and who have encouraged me continuously and provided me continuous support, guidance and motivation in each and every situation. I might have forgotten some people for that I sincerely apologize.

First of all, I would like to express my deep gratitude to my advisor Dr. Suman Kalyan Pal for providing me an opportunity to work with him and his continuous motivation encouragement, guidance and endless support. I acknowledge the guidance and suggestion provided by the members of my DC committee.

I would like to sincerely thank to my teacher, Mr. Mahendra Kumar who helped me in understanding of science and encouraged me for research.

I would like to thank Dr. Torbjörn Pascher of Department of Chemical Physics, Lund University, Lund, Sweden, for helping me with data analysis in the Matlab. Thanks to Dr. S. Mitra and Mrs. S. Phukan, Department of Chemistry, North-Eastern Hill University Shillong, Shillong and Dr. S. Mukhopadhyay and Mr. Dominic Narang of IISER Mohali for helping me in TCSPC measurements.

I express my sincere thanks to Prof. T. A. Gonsalves, the Director, IIT Mandi for his support and encouragement. The research facility at Advanced Materials Research Center (AMRC), IIT Mandi is gratefully acknowledged.

It was a great experience to work with Dr. Subrata Ghosh and Mr. Sunil Kumar. My thanks to Dr. Pradyumna Kumar Pathak, Dr. Hari Verma, Dr. Prasanth P. Jose, Dr. Bindu Radhamany and Dr. Chayan Kanti Nandi for their valuable advices during course work.

I would like to thank my group members Himadri Chakraborti, Abdus Salam Sarkar, Ashwin Thakur, Supriya Ghosh, Nagaraju Nakka, Amir Mustaq and Rajeev Ray for making research discussion in group meetings at every weekend interesting and maintaining nice working environment. It was fantastic to share times with Vimal Kumar Pathak and Supriya Ghosh at the Kamand campus.

My special thanks to Jai Prakash, Lakshman, Sougata, Abhishek, Sunil Dutt, Sindhu, Anna, Navneet, Vivek Mishra, Dr. Charu, Pooja, Syamantak, Pankaj, Manisha, Abhishek Gupta, Jitendra, Rajiv, Jalim, Sohan, Manoj, Ashish, Prateep, Dr. Rajesh, Reena, Tripti, Shilpa, Rambabu, Guru, Lingeswar Reddy, Raj kumar, Gourav, Abhishek Gupta, Sujeet, Navneet, Vishal, Muninder and all AMRC staff for their support and encouragement.

Most importantly, I offer my deepest gratitude from the bottom of my heart to all my family members and relatives for their patience love and care. I extremely acknowledge my special friend Archana for her inspiration and motivation. Without them this work would never have come into existence.

Table of Contents

1. General Introduction	1
1.1. Photophysical Processes in Unimolecular System.....	3
1.1.1. Absorption	5
1.1.2. Emission.....	6
1.2. Photophysical Processes in Bimolecular System.....	7
1.2.1. Quenching Mechanism.....	8
1.2.2. Photoinduced Electron Transfer.....	9
1.2.2.1. Photoinduced Intramolecular Electron Transfer.....	9
1.2.2.2. Photoinduced Intermolecular Electron Transfer.....	10
1.2.3. Fluorescence Resonance Energy Transfer (FRET).....	13
1.3. Semiconductor Nanostructures.....	16
1.3.1 Size Matters.....	16
1.3.2. Nanostructures.....	18
1.3.3. Zinc Oxide Nanoparticles.....	21
1.4. Importance of this Thesis in the Context of Current Status of the Research on Interfacial Interaction between Quantum Dot and Organic Molecule.....	23
1.5. Scope of the Thesis.....	26
References.....	28
2. Experimental Techniques and Computational Methods	36
2.1. Introduction.....	36
2.2. Experimental Techniques.....	36

2.2.1. Steady State Spectroscopic Methods.....	36
2.2.1.1. Absorption Measurements.....	36
2.2.1.2. Fluorescence Measurements.....	39
2.2.1.3. Excitation Spectra	41
2.2.1.4. Fluorescence Quantum yield.....	42
2.2.2. Time-resolved Spectroscopic Methods.....	42
2.2.2.1. Time-resolved Fluorescence Spectroscopy.....	43
2.2.2.2. Transient Absorption Spectroscopy.....	45
2.2.3. Transmission Electron Microscopy.....	49
2.3. Synthesis of ZnO QDs.....	51
2.4. Computational Methods.....	52
2.4.1. Molecular Mechanics.....	53
2.4.2. Semi-empirical Methods.....	53
2.4.3. Ab Initio Methods.....	53
References.....	55
3. Role of Decoupled Defect Transitions of ZnO QDs in Energy Transfer	58
3.1. Abstract.....	58
3.2. Introduction.....	58
3.3. Materials.....	60
3.4. Results.....	60

3.4.1. Analysis of Steady State Measurements.....	60
3.4.2. Analysis of Time-Resolved Fluorescence Measurements.....	66
3.5. Discussion.....	69
3.6. Conclusions.....	72
References.....	72
4. Global Analysis of Quenching of the Time-resolved Emission of ZnO QDs by Adsorbed Rhodamine B on the basis of Tachiya Theory	76
4.1. Abstract.....	76
4.2. Introduction.....	76
4.3. Materials and Methods.....	78
4.4. Results and Discussion.....	79
4.4.1. Steady-State and Time-resolved Measurement.....	79
4.4.2. Analysis of Fluorescence Kinetics	81
4.5. Conclusions	87
References.....	88
5. Ab Initio Assessment of the Structural and Optoelectronic Properties of Organic-ZnO Nanoclusters	91
5.1. Abstract.....	91
5.2. Introduction.....	91

5.3. Computational Details	94
5.4. Results and Discussion.....	95
5.4.1. BC5 Dye	95
5.4.2. Zinc Oxide Nanoclusters	98
5.4.3. Alignment of Energy Levels and Electron Transfer.....	102
5.4.4. Adsorption of BC5 on ZnO Nanoclusters.....	104
5.4.5. Optical Properties of Adsorbed BC5 on ZnO Nanoclusters.....	107
5.5. Conclusions	111
References.....	111
6. Femtosecond Insights into Direct Electron Injection in Dye Anchored ZnO QDs following Charge Transfer Excitation	116
6.1. Abstract.....	116
6.2. Introduction.....	117
6.3. Materials	119
6.4. Results and Discussion.....	119
6.4.1. Adsorption of Dye on QDs and Formation of Charge Transfer Complex	119
6.4.2. Time-resolved Emission Studies	122
6.4.3. Femtosecond Transient Absorption Studies	124
6.4.4. Computational Studies	131

6.5. Conclusions	135
References.....	136
7. Ultrafast Multiexponential Electron Injection Dynamics at dye and ZnO QD	
Interface: A Combined Spectroscopic and First Principles Study	141
7.1. Abstract.....	141
7.2. Introduction.....	141
7.3. Materials	144
7.4. Results and Discussion.....	145
7.4.1. Ground State Properties and Absorption Spectra.....	145
7.4.2. Excited State Properties and Emission Spectra	148
7.4.3. Time-resolved Fluorescence Dynamics	150
7.4.4. Femtosecond TA Studies	152
7.4.5. Thermodynamics of Electron Transfer	156
7.4.6. Theoretical Insights	158
7.5. Conclusions	160
