

Eggshell derived antibacterial cement-based composites

A thesis

submitted by

Dikshita Nath (S20008)

In the partial fulfillment of the requirements for the degree of

MASTER OF SCIENCE

(by research)

School of Engineering

INDIAN INSTITUTE OF TECHNOLOGY, MANDI

Mandi, Himachal Pradesh-175001

MARCH 2021

Dedicated to

HOPE

Declaration by the Research Scholar

This is to certify that the thesis titled “**Eggshell derived antibacterial cement-based composites**” submitted by me, to the Indian Institute of Technology Mandi for the award of the degree of **Master of Science (by research)**, is a bonafide record of the research work carried out by me in the School of Engineering, Indian Institute of Technology Mandi, under the supervision of Dr. Rahul Vaish and Dr. Rajeev Kumar. The contents of this thesis, in full or in parts, have not been submitted to any other Institute or University for the award of any degree or diploma.

In keeping with the general practice of reporting scientific observation, due acknowledgements have been made wherever the work described is based on the findings of other investigators.

Acknowledgements

I would like to express the deepest appreciation to my advisor, Dr. Rahul Vaish, for his continuous encouragement and unconditional support throughout my tenure at IIT Mandi. He provided me the opportunity to freely choose my path, while sharing his invaluable experience and knowledge as well as his precious time. This project is an outcome due to his consistent support and help.

I am grateful and thankful to Dr. Rajeev Kumar for mentoring me consistently with my research work and encouraging me to pursue on my chosen path.

My heartfelt gratitude to Dr. Vishwanath Balakrishnan for constantly encouraging me to challenge on my career goals and to keep pursuing research.

I am thankful to Prof. Timothy A. Gonsalves, for constantly motivating me to explore and relate life and research in the eyes of a common man. His consistent encouragement for helping me develop insights on everyday life and challenges is truly remarkable.

I would also like to extend my gratitude to the faculty at IIT Mandi for their teachings and guidance on my coursework, especially, Dr. Rajneesh Sharma, Dr. Dericks P Shukla, Dr. Kaustav Sarkar, Dr. Mousumi Mukherjee and Dr. Gaurav Bhutani. I would like to thank all my professors for having taught me the necessary courses to help me widen my scope of research.

I also wish to acknowledge the members of my thesis committee for their critical appraisal of my research and annual progress. My obligations to Dr. Vishal Singh Chauhan, Dr. Jaspreet Kaur Randhawa and Dr. Aditi Haldar for their valuable time and consideration and impartial judgements of my research work.

Much of my efforts would not have been successful without proper help and support from my

lab-mates and friends: Rajneesh Kashyap, Gurpreet Singh, Moolchand Sharma, Vishvendra Pratap Singh, Manish Kumar and Minku Arora. My deepest gratitude to Praveen Kumar from the BioX facility for helping me with my research work.

My dearest friends and colleagues, Sushma, Preethi, Deepak, Isha, Smriti and Vyoma for constantly being a support and family in a place called home away from home in the Himalayas.

I offer my enduring gratitude to the faculty and staff at School of Engineering, IIT Mandi.

Finally, I would like to thank my family, Ma, Dita and Suhi for being beside with me always, through all the stormy days and the bright sunny days.

This thesis is an utmost dedication to my mentor Dr. Daisaku Ikeda.

Dikshita Nath

March 2021

Table of Contents

Chapter 1 : Introduction	1
1.1 A Global Perspective.....	1
1.2 Motivation.....	3
1.3 Literature Review.....	3
1.3.1 Sustainability and Waste management	3
1.3.3 Global production of eggs.....	3
1.3.3 A brief introduction to eggshell	6
1.3.4 Structure of the eggshell	8
1.3.5.1 <i>X-Ray Diffraction (XRD) Characterization</i>	
1.3.5.2 <i>Scanning Electron Microscope (SEM) Characterization</i>	
1.3.5.3 <i>Energy Dispersive (EDS) Analysis</i>	
1.3.5.4 <i>Fourier Transform Infrared (FTIR) Characterization</i>	
1.3.6 Properties of the eggshell.....	12
1.3.6.1 <i>Physical and mechanical properties of the eggshell</i>	
1.3.6.2 <i>Chemical properties of eggshell</i>	
1.3.6.3 <i>Biological properties of eggshell</i>	
1.3.7 Potential uses of the eggshell.....	13
1.3.7.1 <i>Biomedical applications</i>	
1.3.7.2 <i>Bioceramics</i>	
1.3.7.3 <i>Cosmetics</i>	
1.3.7.4 <i>Catalyst</i>	
1.3.7.5 <i>Composite</i>	
1.3.7.6 <i>Energy</i>	
1.3.7.7 <i>Food Industry</i>	
1.3.7.8 <i>Antibacterial activities</i>	
1.3.7.9 <i>Jewellery</i>	
1.3.7.10 <i>Building and construction material</i>	
1.4 Research Objective.....	17

1.5 Methodology	17
1.6 Organization of the thesis.....	17
1.7 Discussion and Conclusion	18
References	20
Chapter 2 : Eggshell derived Calcium Oxide (CaO) based Portland Cement mortar	28
2.1 Introduction	28
2.2 Experimental studies	30
2.2.1 Preparation of eggshell derived CaO	30
2.2.2 Characterization of powdered samples	31
2.2.3 Preparation of the composites	32
2.2.4 Antibacterial test procedure on powdered and mortar samples	
2.3 Results and discussion	32
2.3.1 Thermogravimetric analysis (TGA) of the eggshell powder	33
2.3.2 XRD Analysis of heat-treated eggshell powder.....	34
2.3.3 FTIR Analysis of heat-treated eggshell powder	36
2.3.4 SEM and EDS studies of heat-treated eggshell powder	37
2.3.5 DRS of cement-based composites	39
2.3.6 Antibacterial study of cement-based CaO composites	41
2.3.7 XRD study of cement based CaO composites	42
2.3.8 SEM study of cement based CaO composites	43
2.4 Conclusions	43
References.....	44
Chapter 3 : Eggshell derived Calcium Fluoride (CaF₂) based Portland Cement mortar.....	52
3.1 Introduction	52
3.2 Experimental studies.....	53
3.2.1 Reaction of heat-treated samples	53
3.2.2 Mortar Composite Preparation.....	55
3.2.3 Antibacterial tests on etched samples	55
3.3 Results and discussions.....	56
3.3.1 XRD Analysis of powdered etched samples.....	56
3.3.2 FTIR of powdered etched samples	58

3.3.3 SEM analysis of samples	60
3.3.4 Antibacterial activity of powdered samples.....	60
3.3.5 XRD analysis of CaF ₂ -Mortar samples.....	62
3.3.6 SEM and EDS analysis of CaF ₂ -Mortar samples	64
3.3.7 Antibacterial results of CaF ₂ -Mortar samples.....	67
3.4 Conclusions	68
References.....	70
Chapter 4 : Summary and Conclusion	74
4.1 Conclusion.....	74
4.2 Future scope	75
