Thermo-mechanical Properties of Polymer CNT Composites: Experimental and Multi-scale Modelling Approach

A thesis

Submitted by

Gaurav Arora
(D16053)

In fulfilment of the requirement for the degree of

Doctor of Philosophy

Under the guidance of

Dr. Himanshu Pathak

(School of Engineering)

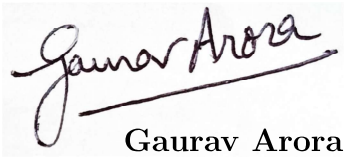
INDIAN INSTITUTE OF TECHNOLOGY MANDI
KAMAND, MANDI-175005
HIMACHAL PRADESH, INDIA

Acknowledgement

It is an honour for me to thank all the people who have made this thesis possible. First and foremost, I offer my sincere gratitude to my supervisor **Dr. Himanshu Pathak**. In every sense, this work would not have been possible without his constant encouragement, valuable guidance, support and patience during the research.

I would like to thank all the APC members, lab staff, members of the School of Engineering for their support. I am very much thankful to the Ministry of Human Resource Development, Government of India for providing financial support for the thesis work.

I would also like to thank my lab members and friends for their support, suggestion, and making the journey enjoyable. My deepest gratitude goes to my parents and wife for their unparalleled contribution and blessings. Last but not the least some close friends, Ankit Gupta and Manoj Kumar Singh, for their help and contribution.



Gaurav Arora

Enrollment No. D16053

Candidate's Declaration

This is to certify that the thesis entitled **"Thermo-mechanical Properties of Polymer CNT Composites: Experimental and Multi-scale Modelling Approach"**, submitted by me to the **Indian Institute of Technology Mandi** for the award of the **Degree of Doctor of Philosophy** is a bonafide record of research work carried out by me under the supervision of **Dr. Himanshu Pathak**. The content of this thesis, in full or in parts, have not been submitted to any other institute or university for the award of any degree or diploma.

Date: 13/09/2021

Place: **IIT MANDI**

Thesis Certificate

This is to certify that the thesis entitled "**Thermo-mechanical Properties of Polymer CNT Composites: Experimental and Multi-scale Modelling Approach**", submitted by **Gaurav Arora** to **Indian Institute of Technology, Mandi**, is a record of bonafide research work under my supervision. The contents of this thesis, in full or in parts, have not been submitted to any other Institute or University for the award of any degree or diploma.

In keeping with the general practice of reporting scientific observation, due acknowledgements have been made wherever the work described is based on the findings of other investigators.

Himanshu Pathak

Table of Contents vi

List of Figures xii

List of Tables xv

Abstract xvi

Abbreviations xviii

List of Symbols xx

1 Introduction 1

1.1 Polymer CNT Composites (PCNTs) 2

1.2 Basic Principle of Microwave Processing of PCNTs 5

1.3 Experimental Characterizations of PCNTs 6

1.4 Computational Analyses of PCNTs 10

1.5 Applications of PCNTs 13

1.6 Thesis Overview 15

1.7 Concluding Remarks 18

2 Literature Review **19**

2.1 Introduction 19

2.2 Polymer CNT Composites 20

2.3 Computational Methods for the Effective Mechanical and Thermo-mechanical Properties 23

2.4 Computational Method for Bio-composite Analyses 30

2.5 Nano-mechanical Characterization of Polymer CNT Composites . . . 32

2.6 Objectives of the Proposed Thesis 34

2.7 Plan of Work 35

2.8 Concluding Remarks 36

3 Mathematical formulation **37**

3.1 Introduction 37

3.2 RVE-Homogenization 37

3.3 RVE-FEM 40

3.4 Problem Formulation 41

3.4.1 Meso-scale Model 41

3.4.2 Macro-scale Model 47

3.5 Concluding Remarks 53

4 Composite Processing and Experimental Characterizations **54**

4.1 Microwave Processing Technique 55

4.1.1 Materials 55

4.1.2 Fabrication of Polymer CNT Composites 56

4.2 Experimental Characterizations of Polymer CNT Composites 59

4.2.1 Destructive Testing 59

4.2.2 Non-destructive Testing 72

4.3 Concluding Remarks 94

5 Meso-scale Computational Modelling for Mechanical and Thermo-mechanical Properties **95**

5.1 Validation of Various Computational Studies 96

5.2 Meso-scale Computational Modelling of Aligned CNT in the Polymer Matrix 99

5.3 Meso-scale Computational Modelling of Random CNTs in the Polymer Matrix 113

5.3.1 Micromechanical Procedure 113

5.3.2 RVE Homogenization Procedure 113

5.4 Thermo-mechanical Analysis of Random CNTs in the Polymer Matrix 123

5.4.1 Statistical Analysis using Weibull distribution 139

5.5 Computational Method for Bio-composite Analyses 141

5.5.1 Parametric Study 143

5.6 Concluding Remarks 151

6 Macro-scale Computational Modelling for Fracture Properties **152**

6.1 Random CNTs in the Polymer Matrix Subjected to Mechanical Loading 152

6.2 Random CNTs in the Polymer Matrix Subjected to Thermo-mechanical Loading 154

6.3 Concluding Remarks 159

7 Conclusions and Future Scope **160**

7.1 Experimental Analyses 161

7.2 Computational Analyses 164

7.3 Limitations of Present Work 167

7.4 Scope of Future Work 168

Publications **195**

Journal 195

Conference 196

Book Chapter 197
